Gravel Grid Base

Ecoraster Grid

Key Facts:

- Excellent water drainage through the surface.
- Durable, non-rotting and weather resistant.
- High stability due to a strong web.
- Frost and UV resistant.
- The light weight interlocking design enables ease and speed of installation.
- 20 year warranty.
- No rodents digging underneath your sheds.
- Don't have to pay taxes on this pad every year because it's not considered permanent.

13"

1 1/2"
thick

13"

Great For:

- Shed Bases
- Driveways
- Walkways

Shed is placed on Limestone Grid Base

TRUPOINTBACKYARDS.COM

We'll take care of you before, during, & after

For most companies, warranties are carefully worded documents designed to legally protect them - not their customers. Instead of following standard industry practices, we decided to follow a simple idea instead:

We do whatever it takes to provide the best quality and experience in the industry - before, during and after your purchase.

Before

If you aren't quite sure what you want or need, we'll help you figure out without pressuring you into a sale. In fact - if we think you'll find a better shed elsewhere, we'll tell you.

During

As you design your building, from start to finish, we'll help you design the shed that's perfect for you, without pressuring you - ever. And when we deliver your shed we'll make sure the building is level and set exactly where you want it before we leave. We got your back.

After

After your purchase and delivery, we'll stay in touch occasionally to make sure you are satisfied with your building. We provide the best customer service in the industry. if any questions or issues arise, our team is here to help.

We would be honored if you gave us a try.
